Terms and Conditions of Sale

We pay shipping costs to all points in the United States, Canada and Alaska, on all B. R. Lining Out Stock. Most all of our Evergreens are grown and handled bareroot. It is our experience that we can give you a much better root system this way.

Terms of Payment

Cash with order earns a 3% discount, and packing is free. C.O.D. will be considered as a cash order when deposit of 25% is sent with order.

Our listed per each price is also the per 100 price. A customer may purchase any quantity. In some instances we offer a discount in lots of 1000.

We are located 100 miles South of Atlanta, weather conditions and climate make this an ideal location to grow Broad-leaf Evergreen liners, frost comes about November 15. Liners are dormant and ready for shipment at this time. However, we usually ship from October 1st to May 1st.

We will appreciate a trial order.

ABELIA (EDWARD GOUCHER)

A choice upright Abelia, similar to Grandiflora, but with foliage of richer coloring, especially in the fall, when it takes on a lovely cast. The abundant flowers which cover this plant all summer and fall are deep pink shading to a soft lavender and mingle in perfect perfection with the full fine foliage. **Strong Rooted Cuttings, Spring Delivery—10c each**

ABELIA GRANDIFLORA

This variety needs no description. Our stock is all field grown. It will grade 12-15. in bushy, nice stock. A nice hedge size.

For Your Retail Sales ----- 25c each

ABELIA GRANDIFLORA SHERWOODI

(Sherwood Dwarf Abelia)

The leaves and flowers of this variety are about one-half the size of Grandiflora, it grows very compact. We consider this a very choice plant, as it fills a long felt need, especially as a dwarf hedge. It is a fine plant to use in double borders, wherever a low blooming evergreen is needed.

Small Rooted Cuttings ----- 5c each

Stock Is Limited

JORDAN NURSERIES

Wholesale List—Aug. 1948

AUCUBA JAPONICA (GREENLEAF AUCUBA)

(Pollenizers)

Male plants. Aucuba do not bear berries unless pollenizers are planted with them. The large red berries are one of the attractive features of the Aucubas. Shade loving evergreens.

1 Year Plants, Once Trans. --- 17½c each
2 Year Plants, Twice Trans. --- 35 c each

AUCUBA JAPONICA NANA (DWARF AUCUBA (Female)

This is a dwarf variety with beautiful green leaves and a profusion of bright scarlet berries born in clusters making a combination of surpassing beauty. Leaves smaller than other Aucubas. This variety is hardy in U. S., and some parts of Canada. Comparatively new and rare, but certain to find a place in many gardens. Shade loving evergreen.

1 Year Plants, Once Trans. --- 17½c each

AUCUBA JAPONICA VARIEGATED

This variety is like the Greenleaf Aucuba in leaf and growth. Leaves are splotched and variegated. Our propagating wood was collected in Atlanta. We think we have a very fine strain. The white and yellow variegations are heavy.

1 Year—4-6-In. --- 17½c
2 Years—4-in. in Pots --- 35 c

BUXUS SEMPERVIRENS SUFFRUTICOSA

(Truedwarf Boxwood)

This is the English Boxwood, a very slow grower with rounded leaves. We have a large supply in the one-year and two-year sizes.

1 Year Plants—Not Trans. 4c each—\$37.50 per M
2 Year Plants—Trans. --- 10c each—\$95.00 per M

BUXUS SEMPERVIRENS

This variety is very hardy, a much faster grower than the English Boxwood and has pointed leaves. It makes a lovely, bushy plant, and is not to be confused with tree boxwood. It grows compact.

1 Year, 3-4 In. --- 5c each—\$45.00 per M
1 Year, 4-6 In. --- 8c each—\$75.00 per M
2½ In. Pots --- 15c each
2 Year Trans. --- 18c each

BUXUS HARLANDI

(Chinese Boxwood)

A rapid growing Boxwood which will grow satisfactorily in most any type of soil. This variety is not hardy in cold sections. It is hardy in all the Southern States and up the coast to Virginia. Our stock is limited.

3-4 In. --- 10c each
4-6 In. --- 15c each

BUXUS JAPONICA

(Japanese Boxwood)

A fast growing light green box that makes a splendid hedge and specimen plant. It is fairly hardy, though not quite as much as Sempervirens. Leaves are large.

6-8 In. --- 12c each

We pay shipping cost of all liners to any point in U. S., Canada, and Alaska. No packing charge is made. A SAVING OF TEN PERCENT FOR OUR CUSTOMERS.

References: Exchange Bank of Milledgeville, Ga.

BUXUS ANGUSTIFOLIA

This is an improved Sempervirens type which we like very much. Our propagating wood comes from Macon, Ga. It was given to us by Mrs. T. J. Stewart. The leaves are a great deal like Sempervirens in size and shape. The color is darker green. Very hardy.

4-6 In. Rooted Cuttings 5c each

BUXUS ARBORESCENS

(Tree Boxwood)

This variety grows compact and shapely without pruning. During the first few years it does not develop into full shape. It takes several years of growth to make a full specimen plant.

3-4 In. Rooted Cutting 5c each

Two Year 6-8 In. Bushy 15c each

CAMELIA SASANQUA

CLEOPATRA—Large beautiful cherry red flowers, heavy, dark green foliage.

MINO-NO-YUKI—Irregular white, semi double, free and profuse bloomer.

ROSEA—Large, deep pink flowers, upright grower.

2-Year Old—12-18 In. Sizes—Twice Trans. 35c

SHISHI GASHIRA—This variety is semi-double, deep pink, 15 to 17 petaled flowers, four inches across. It comes from the West Coast, and is in great demand in the South this season.

6-8 In.—from 2½ to 3 in Pots \$2.50 each

We will have some R. C. in Sasanqua for Spring Delivery at 10c each.

Hydrangea—Blue or Pink, 3 in Pot 15c

Spring Delivery Only on Hydrangeas

Photonia Serrulata—3-4 In. 5c

Photonia Serrulata—4-6 In. 10c

Pittesporium Tobira—4-6 In. 8c

Pyracantha Formosana

This variety of Pyracantha berries profusely, the scarlet red berries come in heavy bunches. They remain on the bush throughout the winter in the Southern States. The two sizes offered can be used in mail orders and landscape work.

Size 10-15 In. 15c

Size 15-18—One Year 20c

Tea Plant (Thea Sinensis)—4 in Pots 10c

Sargents Evergreen Barberry—4-6 In. 10c

Viburnum Macrophyllum—4-6 In. 10c

Viburnum Tinus—4-6 In. 10c

NOTE: The above two Viburnums hardy only in Southern States.

PODOCARPUS SINENSIS

(Japanese Yew)

8-12 TT 15c each

LIROPE SPICATA

(Dwarf Creeping Lirope)

Thrives in shade in the Southern States and makes a splendid ground cover or lawn in total shade. Upright grower, the small leaves resemble grass. Hardy North.

3-4 In.—Single Plants 5c each

COCAS AUSTRALIS

(Hardy Palm)

This variety is hardy in Atlanta. The graceful, arching branches make it a splendid shrub to border drives; also used as a specimen in landscape work.

1 Year Size—4-6 In. ----- 6c each
2 Year Size— Heavy ----- 25c each

JUNIPERUS CHINENSIS FOEMINA

(Chinese Juniper)

This is one of our best Junipers, grows compact, pyramidal, green all winter. The shiny, bright green foliage is most attractive. 12 to 15 ft.

1 Year—6-8 In. ----- 17½c each

CEDRUS DEODARA

4-6 In. ----- 12½c
6-8 In. ----- 15 c

GINKGO BILOBA

(Saliburia Adiantifolia)

Beautiful and interesting tree from Japan, of large size, rapid and erect growth, foliage resembles maidenhair fern. Free from disease and insect pest. Hardy North.

2 Year—12-18 In. Tall ----- 20c each
3 Year—18-24 In. Tall ----- 35c each

CLEYERI JAPONICA—6-8 In. Plant, strong roots ----- 17½
roots ----- 17½c

ELEGNUS PUNGENS—6-8 In. 7c each

ELEAGNUS FRUITLANDI—This variety was originated at Augusta, Ga., Fruitland Nurseries. We consider it the best variety. Leaves large, pointed, beautiful silvery beneath.

1 Year Old—8-12 In. with Heavy Roots 15c each
GARDENIA FLORIDA, 4-6 In. ----- 10c each

ILEX CORNUTA FEMINA

(Horned Holly)

10-12 In.—One Year with Strong Roots 20c each

ILEX BURFORDI

(Single Spine Holly)

This variety is very profuse in bearing berries. Here in the South it is the most popular dwarf variety. The berries turn red early and stay on the bush until mid-summer.

2½ In. Pots—1 Year Old ----- 20c each
2 Year Old Plants—10-12 In., Heavy Roots 25c

ILEX CRENATA BULLATA

(Convexa)

This is one of the dwarf varieties, foliage resembles boxwood, though the plant is somewhat spreading at the top in manner of growth. This variety is used extensively in landscaping. It is hardy in the North.

One Year Old—6-8 In. Strong Roots ----- 17½c
One Year Old—8-12 In. Strong Roots ----- 20 c

ILEX CRENATA ROTUNDIFOLIA

Has larger leaves than Bullata, very hardy and extensively used in the South and East.

6-8 In., Strong Roots ----- 17½c
8-12 In., Strong Roots ----- 20 c

ILEX CRENATA MICROPHYLLA

This variety is in short supply. We hope to have a good stock of it next season. Resembles Rotundifolia in foliage and habit of growth, as the plant takes on mature growth, tops are slightly

spreading.

4-6 In., Strong Roots	15 c
6-8 In., Strong Roots	17½c

ILEX OPACA HOWARDI (Howard Holly)

This is our best variety in large growing types. It berries profusely when small, leaves are somewhat like our native Holly. The berries come in neat, small clusters up and down the stems. Bright red berries are very attractive. After a number of years this type makes a large tree. It should be given plenty of room to grow.

4-6 In., Strong Rooted Cuttings	15c each
April 1st Delivery, 1949	

NOTE: This variety is hard to propagate. We have farmed out a contract with a Gulf Coast Nursery for Spring delivery.

MAHONIA BEALEI (Leather Holly Grape, 1 year seedling)	6c each
---	---------

3 In Pots—25c
